

Math Daily Activity Chart

Over the course of this week, you will need to do one of each activity. The amount of time spent should be 20-30 minutes. A few ideas are provided but you can be creative! The order is up to you.

<h3>Math by Myself</h3> <ul style="list-style-type: none">• Roll Dice and add every two numbers. Track how many odd/even numbers are rolled.• Practice math facts. Depending on your grade it may be addition, subtraction, multiplication, or division.	<h3>Math with Someone</h3> <ul style="list-style-type: none">• Play a game like Othello, Yahtzee, or Dominoes.• Go on a scavenger hunt trying to locate a specific number of items (i.e., one rubber band, two pens, three pairs of white socks, etc.).
<h3>Writing about Math</h3> <ul style="list-style-type: none">• Roll a die three times and write each number down. Write a story or a word problem that contains each number and at least one order of operation.	<h3>Math with Technology</h3> <ul style="list-style-type: none">• Practice on sites you used at school like First in Math.• If you have an iPad or other smart device, ask your parents to download some fun math apps. Many are free.
<h3>Math around the House</h3> <ul style="list-style-type: none">• Select a math vocabulary word or shapes you have learned this year (i.e., triangle, parallel, line segment) and see how write down where you see examples.
